5 1/2" 6"   8 1/4" 8 3/4" 9"

**4 1/4"**

With this piece
you can make
the pull strip

glue tab

1/8"

← **11"** →

1/2"
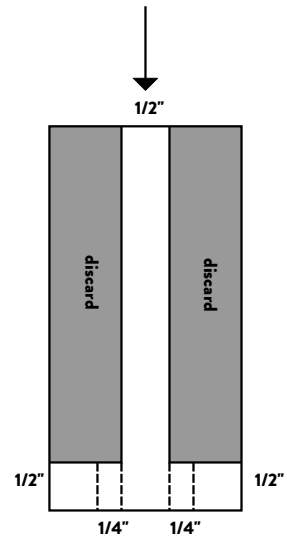

I made the slit about 3/4 from the top and bottom edges,
but it will depend on the chocolate you´re going to put.

Behind the card, to hide the pull tab, glue an extra foiled card front,
with the excess from the foil you used for the front.

I made a little box to contain the chocolate, about 3/8" height and
a little more of the width of the chocolate. I glue it on the flaps.
But maybe you can adhere the chocolate with double sided tape,
but it´s difficult to remove that way (I think).

discard   discard

1/2"   1/2"

1/4"   1/4"

Fold this way
and put it through the 1/8" slit
from the back of the card.
Tape the two flaps and cut the excess if they are too long
